POWER HAND MIXERS

Greene County Public Health enforces the section of the Ohio Food Code which only allows for equipment that is approved by a recognized testing agency. Accreditations accepted are NSF, commercial UL, ETL and CSA [see section 3717-1-4.1 (KK)].

Maintenance drills purchased at a hardware store and mixing attachments purchased at a paint store are not considered approved equipment and are not permitted to be used within your food operation.

The websites below should be used as examples to locate an approved product that suits your needs. You can Google power hand mixers as well.
